

# Naming convention of the font files

Our fonts are available in various different styles. The following table describes the naming convention of the font files.

!	Base	Weight	Substyle	Deco	internal Font Name
	R				Regular
		B			Bold
			I		Italic
		Z			Semibold
	C				Condensed (not yet available)
	K				Keyboard Style
a					automatically generated by script (no manual correction) can also be understood as “alpha”
			L		Slanted
				W	Shadow
				U	Outline
	S				SmallCaps

Example: LinLibertine\_RBI.otf is the Bold Italic style to the base font LinuxLibertine.
